

(a) against well mixed

(b) against a constant ratio

First dataset (kernel calibrated on trains / restaurant)

Zhejiang bus

Hunan coach

Flight VN54

Marin classroom

Guangzhou restaurant

Second dataset (kernel calibrated on pre-2020 outbreaks)

Flight to Naha

Sydney-Perth

Dubai-Auckland (EK448)

Tel Aviv-Frankfurt

Meat-processing line

log score:
model minus well mixedlog score: model
minus constant ratio

- M2, mixing coefficient fitted to outbreaks
- mixing coefficient fixed by tracer measurements

- against fixed risk ratios 2 (above) and 3 (below)
- tracer-fixed kernel, exploratory (outcome-aware)
